

# Job Application Analysis Dashboard with Star Schema

Pada project ini digunakan model data Star Schema dengan satu tabel fakta yaitu FactApplication yang menyimpan data utama proses lamaran kerja. Tabel ini dihubungkan dengan tiga tabel dimensi, yaitu DimCandidate untuk informasi kandidat, DimVacancy untuk informasi lowongan, dan DimDate untuk informasi waktu.

Relasi data menggunakan skema Many-to-One dari tabel fakta ke tabel dimensi sehingga membentuk pola bintang (Star Schema).

Visualisasi yang dibuat meliputi jumlah lamaran berdasarkan status, distribusi lamaran berdasarkan kualifikasi pendidikan, serta tren jumlah lamaran berdasarkan waktu. Visualisasi ini membantu memahami pola data secara lebih mudah dan informatif.

PREVIEW DOWNLOADED AT 9:13 AM

The screenshot displays the SQL Server Data Tools (SSDT) interface. The main area shows a data model diagram with three tables: DimCandidate, FactApplication, and DimVacancy. DimCandidate is connected to FactApplication with a one-to-many relationship. DimVacancy is connected to FactApplication with a one-to-many relationship. DimDate is also connected to FactApplication with a one-to-many relationship. The FactApplication table is the central fact table, connected to the three dimension tables (DimCandidate, DimVacancy, and DimDate) via many-to-one relationships. The FactApplication table has columns: ApplicationID, ApplicationStatus, CandidateID, CreatedDate, and Qualification. DimCandidate has columns: CandidateID and Gender. DimVacancy has columns: VacancyEndDate, VacancyID, VacancyName, and VacancyStartDate. DimDate has columns: Date, Day, Month, Week, and Year.

Below the diagram, a table summarizes the relationships:

| From (Many)                  | To (One)                  | Relationship |
|------------------------------|---------------------------|--------------|
| FactApplication[CandidateID] | DimCandidate[CandidateID] | Many-to-One  |
| FactApplication[VacancyID]   | DimVacancy[VacancyID]     | Many-to-One  |
| FactApplication[CreatedDate] | DimDate[Date]             | Many-to-One  |

| From (Many)                  | To (One)                  | Relationship |
|------------------------------|---------------------------|--------------|
| FactApplication[CandidateID] | DimCandidate[CandidateID] | Many-to-One  |
| FactApplication[VacancyID]   | DimVacancy[VacancyID]     | Many-to-One  |
| FactApplication[CreatedDate] | DimDate[Date]             | Many-to-One  |
